

Skill Shortage List

South Australia

2017

This list shows occupations which were assessed in 2017 by the Department of Jobs and Small Business specifically for South Australia, for which shortages or some recruitment difficulty is evident. Additional occupations were assessed for Australia as a whole (state-level information is not available). A listing of ratings from this research is available on page four.

These lists are summary in nature and should be viewed in the context of the more detailed analysis available in the occupational reports which are published on the Department's website.

Ratings of shortage reflect employers' recruitment experience for workers with around three years or more experience in the relevant occupation. Shortages may exist in occupations which have relatively high rates of unemployment. A rating of shortage does not mean that an individual will necessarily gain employment in that occupation.

The lack of a rating for an occupation does not necessarily imply 'no shortage' as the occupation may not have been assessed. Reports for occupations assessed for South Australia are published at [state and territory skill shortage information](#). For the complete set of occupational reports, see [skill shortage information by occupation](#).

Labour markets can change quickly and vary by location. The assessments made here reflect the labour market at the date shown.

This list has no status for migration.

Details about the methodology used in this research are available at jobs.gov.au/skill-shortages.

Definitions of ratings

Shortage

Skill shortages exist when employers are unable to fill or have considerable difficulty filling vacancies, or significant specialised skill needs within that occupation, at current levels of remuneration and conditions of employment, and in reasonably accessible locations. For occupations assessed at a national level, a rating of S represents a national shortage.

Recruitment difficulty

Recruitment difficulties occur when some employers have difficulty filling vacancies for an occupation. There may be an adequate supply of skilled workers but some employers are unable to attract and recruit sufficient suitable workers for reasons which include: the specific experience or specialist skill requirements of the vacancy; differences in hours of work required by the employer and those sought by applicants; or particular locational or transport issues.

Definition of occupation

Occupations are defined according to the Australian and New Zealand Standard Classification of Occupations ([ANZSCO](#)) which is published by the Australian Bureau of Statistics to provide uniformity in the collection, analysis and dissemination of occupational statistics in Australia and New Zealand.
